

# TrafficPatterns®

A TrafficScapes™ Solution by Ennis-Flint

## SURFACE APPLIED CROSSWALKS & TRAFFIC CALMING SURFACES

Made from durable preformed thermoplastic, TrafficPatterns® provides a cost-effective alternative to the use of brick and stone pavers because the material is surface applied and virtually maintenance free. The pattern and color combinations of the interconnected sheets allow designers the flexibility to create the ideal crosswalk or traffic calming pattern that complements the overall streetscape design.

TrafficPatterns® does not require expensive capital equipment, customized tools, templates or grids for application. The 2'x2' sheets of interconnected material are easily lifted and positioned onto an asphalt or concrete surface. Border segments can be added for design variability. Application is simple with a large infrared heater or a propane heat torch.

### HIGH SKID/SLIP RESISTANT FOR SAFETY

Skid resistance is maximized because anti-skid elements are added to surface and intermix of the material at time of manufacturing. As the marking wears, new anti-skid properties are exposed.

### ENHANCED DURABILITY

- Engineered as heavy-duty intersection grade pavement marking material
- Can last 6 to 8 times longer than painted or epoxy-coated surfaces

### COMPOSITION, ENVIRONMENTAL SAFETY, MAINTENANCE

- Oil and gas impervious, yet compatible with all asphalt surfaces. TrafficPatterns can be applied on newly-stamped asphalt as soon as the road surface cools and sets
- Non-hazardous based on current EPA and OSHA standards either during application or removal
- Pedestrian and wheelchair-friendly surface. Does not leave a bumpy, rigid feel as with pavers
- Eliminates the maintenance and safety concerns of loose pavers
- Repairs can be made with minimal traffic disruption

### MANUFACTURING CONTROL

All preformed thermoplastic materials are made at Ennis-Flint's manufacturing facility which is ISO 9001:2008 certified for design, development and manufacturing of preformed thermoplastic. Quality, value and long-term performance are built into the marking.
