

## COVID-19 Update May 03, 2020

NOTE: The Connecticut Department of Public Health is transitioning to a new process to make the daily collection of data more sustainable. To facilitate this shift, the report issued today (Sunday, May 3) only contains data on hospitalizations and fatalities. The next full report will be issued on the afternoon of Monday, May 4, and will contain combined data from both Sunday and Monday.

As of May 02, 2020, at 8:30PM, **one thousand four hundred eighty-eight** patients are currently hospitalized for COVID-19 in Connecticut, and **2495** COVID-19-associated deaths have been reported.

**Day-to-day changes reflect newly reported cases, deaths, and tests that occurred over the last several days to week.** All data in this report are preliminary; data for previous dates will be updated as new reports are received and data errors are corrected. Hospitalization data were collected by the Connecticut Hospital Association. Deaths\* reported to either the OCME or DPH are included in the daily COVID-19 update.

\*For public health surveillance, COVID-19-associated deaths include persons who tested positive for COVID-19 around the time of death (confirmed) and persons whose death certificate lists COVID-19 disease as a cause of death or a significant condition contributing to death (probable).

Overall Summary	Total	Change Since Yesterday
COVID-19-Associated Deaths	2495	+59
Patients Currently Hospitalized with COVID-19	1488	-63

### COVID-19-Associated Deaths by County of Residence

As of 05/02/20 8:30pm.

County	COVID-19-Associated Deaths
Fairfield County	886
Hartford County	756
Litchfield County	92
Middlesex County	93
New Haven County	580
New London County	43
Tolland County	40
Windham County	3
<i>Pending address validation</i>	2
<b>Total</b>	<b>2495</b>

[National COVID-19 statistics](#) and information about [preventing spread of COVID-19](#) are available from the Centers for Disease Control and Prevention.

## Hospitalization Surveillance

The map below shows the number of patients currently hospitalized with COVID-19 by county based on data collected by the Connecticut Hospital Association. The distribution is by location of hospital, not patient residence. The labels indicate the number of patients currently hospitalized with the change since yesterday in parentheses.

### Patients Currently Hospitalized by Connecticut County

*Distribution by location of hospital not patient residence. Data from the Connecticut Hospital Association.*

More information about hospitalized cases of COVID-19 in New Haven and Middlesex Counties is available from [COVID-NET](#).

## Characteristics of COVID-19-Associated Deaths

Test results may be reported several days after the result. Data are incomplete for most recent dates shaded in grey. Data from previous dates are routinely updated.

**APPENDIX A.** The following graphs show the number and rate of COVID-19-associated deaths by race and ethnicity. Rates are per 100,000 population using population estimate from: [DPH Population Statistics](#). Categories are mutually exclusive. Cases answering 'yes' to more than one race category are counted as 'other'. Counts may not add up to total case counts as data on race and ethnicity may be missing. NH=Non-Hispanic

All data are preliminary and subject to change.
